Short description:

A Great Big version of the awesome Tantillus (by Sublime).

Description:

<div>This is the work in progress 'Ingentis' FDM 3d Printer.</div><div>The design is a derivative of the Utimaker inspired 'Tantillus' design (by Sublime) and takes inspiration from the T-Slot variant produced by GoopyPlastic.</div><div>The usable Build volume is around 300mm on X/Y and about 250 on Z in it's current form. Please be aware, the version I am building is currently in it's prototype phase so the files I've posted are subject to changes as the project develops.
An incomplete build guide can be found here: http://ingentistst.blogspot.co.nz/
